

CRASH REVIEW: TESLA MODEL S-85D

New Information on High Performance Battery Vehicles Every Rescuer Needs to Know

Presented By:

Kevin C. Jones
Special Operations Chief
Indianapolis Fire Department

Andrew "Andy" Hearell
Special Operations Captain
Indianapolis Fire Department

Sponsored By:

ESI Equipment, Inc., *Your Rescue Resource*

The responders at the Indianapolis Fire Department were dispatched to the aftermath of a high speed crash and resultant fire involving a battery car with the highly volatile batteries exposed .

The lessons they learned is information that all rescuers need to know as the popularity and number of battery vehicles increases. It is evident after the November 3, 2016 crash in the city of Indianapolis that high performance battery vehicles present special hazards that need to be recognized.

Learn what to expect, fire and rescue tactics, handling special debris, cleanup and storage post-crash/fire, and vehicle manufacturers expectations on salvage and storage.

Course will be held two days for your convenience.

Friday February 24, 2017

1:30pm to 3:30pm

Saturday February 25, 2017

10am to 12 Noon

Location: ESI Equipment Training Center, 119 Keystone Drive, Montgomeryville, PA 18936
No Cost.

Beverages and snacks provided.
